SUMMARY

Full Stack Developer with **2 years** of production experience shipping **15+ releases** across SaaS and enterprise content platforms. Specializes in scalable Vue.js/Laravel features, reusable component systems, and frontend performance optimization, boosting component reuse by **40%**. Brings AI-accelerated development, low-code platform, and ECM expertise to fast-moving product teams.

CORE SKILLS

- **Languages & Frameworks:** JavaScript, Vue.js, Vue 3, Vuetify, React.js, Node.js, Express, Laravel
- **Data & APIs:** SQL, REST APIs, Unit Testing (Vitest)
- **Tools & Practices:** Git, GitHub, VS Code, CI/CD Pipelines, Frontend Performance Optimization
- **Low-Code & ECM:** SYFol, Low-Code Platform Development
- **AI Tooling:** GitHub Copilot, RAG Pipelines, Vector Databases, Locally Hosted LLMs, Stitch AI

EXPERIENCE

Software Developer

ProcessDrive India | Jul 2024 – May 2026

Rental & Sales Management Platform (SaaS) | Jan 2025 – May 2026

- **Architected** a shared, config-driven Vue.js component library, **increasing reusability by 40%**, and cutting future feature build time across the platform.
- **Spearheaded** delivery of **5+ business-critical workflows** — Invoice Management, Transfer Orders, Custom Coupons, Discount Slabs, and Notification Configuration — **shipping 15+ production releases** with **zero major rollback incidents**.
- **Optimized** frontend performance across key Vue.js views, improving load responsiveness and interaction speed for high-traffic workflows.
- **Accelerated** delivery velocity by **25%** by integrating **GitHub Copilot** and AI-assisted workflows into daily development.
- **Strengthened** release confidence by writing **Vitest** unit tests for business-critical logic, improving regression coverage across core workflows.
- **Elevated** UX quality across invoice and notification workflows, **achieving 95% positive user feedback** through direct stakeholder collaboration and iterative refinement.
- **Operated** within **CI/CD pipelines**, driving consistent build, test, and deployment cycles across releases.
- **Piloted** UI/UX research and prototyping using **Stitch AI** to validate workflow designs before build.

Enterprise Content Management & Low-Code Platform Development | Jul 2024 – Dec 2024

- Built foundational expertise in **Enterprise Content Management (ECM)** and low-code development using **SYFol** to automate unstructured data workflows.
- **Designed** structured record management modules and **streamlined cross-departmental document lifecycle processes** across teams.
- **Engineered** dynamic modules and forms on a low-code platform to power business management workflows, and **built out incident management functionality**, extending the platform's operational capabilities.

PROJECTS

AI-Powered RAG Chatbot — github.com/Jayachandran-dev

- **Built** a Retrieval-Augmented Generation chatbot using vector databases and locally hosted AI models — **zero dependency on OpenAI APIs**.
- **Delivered** end-to-end document ingestion, embeddings, semantic search, and contextual response generation.

Boutique / Tailoring Management ERP — github.com/Jayachandran-dev

- **Designed** a workflow-driven ERP spanning customer management, measurements, order tracking, billing, payments, and delivery, using AI-assisted development practices.

EDUCATION

B.Sc. Computer Science — Periyar University, Tamil Nadu, India (Jun 2021 – May 2024)
