SUMMARY

Full Stack Developer with 2 years' experience building production features for a rental & sales management SaaS platform using Vue.js, Laravel, React.js, Node.js, and REST APIs. Delivered 20+ reusable components and 5+ business-critical workflows across 15+ production releases. Brings strong backend/API depth to JavaScript-first, MERN, and AI-integrated product teams.

KEY ACHIEVEMENTS

- Increased component reusability by 40% by architecting shared, config-driven Vue.js components.
- Reduced development time by 25% by integrating GitHub Copilot and AI-assisted workflows into daily development.
- Shipped 15+ production releases on schedule, including post-release stabilization, with zero major rollback incidents.
- Achieved 95% positive user feedback on UX improvements across invoice and notification workflows.

EXPERIENCE

Software Developer — ProcessDrive India

Jul 2024 – May 2026

Product: Rental & Sales Management Platform (SaaS)

- Built and maintained scalable product features using Vue.js, Vue 3, Vuetify, Laravel, and REST APIs.
- Developed 20+ reusable components, including invoice workflows, payment modules, and WhatsApp notification configuration.
- Delivered 5+ major business workflows: Invoice Management, Transfer Orders, Custom Coupons, Discount Slabs, Notification Configuration.
- Wrote unit tests for business-critical logic using Vitest, improving regression coverage on core workflows.
- Partnered directly with stakeholders to translate business requirements into production-ready features.
- Used GitHub Copilot and AI-assisted workflows to accelerate delivery while maintaining code quality standards.
- Conducted UI/UX workflow research and prototyping using Stitch AI.

PROJECTS

AI-Powered RAG Chatbot github.com/Jayachandran-dev

- Built a Retrieval-Augmented Generation chatbot using vector databases and locally hosted AI models — no OpenAI APIs.
- Implemented document ingestion, embeddings, semantic search, and contextual response generation end-to-end.

Boutique / Tailoring Management ERP github.com/Jayachandran-dev

- Designed a workflow-driven ERP covering customer management, measurements, order tracking, billing, payments, and delivery, using AI-assisted development practices.

SKILLS

Languages & Frameworks: JavaScript, Vue.js, Vue 3, Vuetify, React.js, Node.js, Express, Laravel

Databases & APIs: MongoDB, SQL, REST APIs, Unit Testing (Vitest)

Tools: Git, GitHub, VS Code, HTML

AI Tooling: GitHub Copilot, RAG pipelines, vector databases, locally hosted LLMs, Stitch AI

STRENGTHS

AI-Augmented Development, Product Engineering, Business Requirement Analysis, Reusable Component Architecture, Clean Code, Responsive UI/UX, Technical Problem Solving, Release Management

EDUCATION

B.Sc. Computer Science — Periyar University, Tamil Nadu, India (Jun 2021 – May 2024)
