PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing, developing, and maintaining enterprise web applications for SaaS and business process automation platforms. Skilled in building scalable frontend architectures using Vue.js, Vuetify, React.js, Redux, JavaScript, and TypeScript, integrating REST APIs, and optimizing application performance across Rental Management, Enterprise Content Management (ECM), Low-Code Development, and Progressive Web Application modules. Actively expanding into full stack MERN development and AI-assisted engineering, with hands-on experience building Retrieval-Augmented Generation (RAG) applications using Ollama and vector databases. Recognized for building reusable component architectures, improving development productivity, and delivering reliable production releases in Agile environments.

ROLE HIGHLIGHTS

- Enterprise SaaS Application Development
- Frontend Architecture & Component Design
- Full Stack & AI-Powered Software Development
- REST API Integration & Progressive Web Applications (PWA)
- Enterprise Content Management & Low-Code Platform Development
- Agile Scrum Delivery, Production Support & Performance Optimization

CORE SKILLS & EXPERTISE

Application Development

- Full Stack Web Application Development
- RESTful API Design & Integration
- Enterprise & Low-Code Application Architecture

Process & Methodology

- Agile / Scrum Methodology
- Sprint Planning, Estimation & Reviews
- Requirement Analysis & Technical Documentation

Collaboration & Ownership

- Cross-Functional & Stakeholder Collaboration
- Production Support & Enhancements
- Bug Fixing & Feature Delivery

TECHNICAL SKILLS

Frontend Technologies : React.js, Redux, Vue.js (Vue 2 & 3), Vuetify, Pinia, Vite, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend Technologies : Node.js, Express.js, Laravel, REST APIs

Database Technologies : PostgreSQL, MySQL

AI Technologies : Retrieval-Augmented Generation (RAG), Ollama, ChromaDB, Vector Databases, Prompt Engineering

Testing & Tools : Vitest, Playwright, Git, GitHub, Postman

AI-Assisted Dev Tools : GitHub Copilot, Cursor AI, Claude AI, Stitch AI, VS Code

PROFESSIONAL EXPERIENCE

Software Engineer at ProcessDrive India Pvt. Ltd. – Hosur | July 2024 – May 2026

Enterprise Projects: RentAsst ERP (Rental & Sales Management Platform) and SYFOL (Enterprise Content Management & Low-Code Platform)

Key Responsibilities

- Designed and developed scalable frontend modules using Vue.js and Vuetify for RentAsst ERP, a cloud-based rental and sales management platform covering booking, inventory, invoicing, and payments.
- Built reusable UI component architecture, improving maintainability and development speed.
- Developed Invoice Management, Coupon Management, Discount Slabs, Notification Configuration, Transfer Orders, Booking Management, Asset Management, and Checkout modules.
- Integrated multiple REST APIs with frontend components and developed Progressive Web Application (PWA) features.
- Built configurable workflow modules, dynamic low-code forms, and Incident Management functionality for SYFOL, an ECM and Low-Code automation platform.
- Developed document lifecycle and record management workflows, and configured enterprise process automation.
- Collaborated with UI/UX designers and backend developers to deliver consistent, well-integrated user experiences.
- Participated in Agile ceremonies (Sprint Planning, Daily Standups, Sprint Reviews, Retrospectives); implemented unit testing using Vitest.
- Leveraged GitHub Copilot and Cursor AI to improve productivity; provided production support, bug fixes, and feature enhancements.

Project & Delivery Contributions

- Delivered 15+ production releases with continuous enhancements across enterprise SaaS applications.
- Increased component reusability through modular frontend architecture.
- Automated enterprise workflows and reduced manual business processes through SYFOL's low-code modules.
- Enhanced frontend responsiveness and overall user experience with minimal rollback issues.

PERSONAL PROJECTS

AI-Powered RAG Chatbot — Ollama, ChromaDB, Vector Database, Python, FastAPI, Vue.js

- Designed a complete Retrieval-Augmented Generation (RAG) pipeline to answer queries from organization-specific knowledge rather than general LLM knowledge.
- Built a document ingestion pipeline with website crawling, embedding generation, and semantic vector search; integrated Ollama for local inference.
- Developed a reusable, multi-tenant Shadow DOM chatbot widget with an admin dashboard, reducing hallucinations through contextual retrieval.

Boutique / Tailoring Management ERP — React.js, Redux, Node.js, Express.js, PostgreSQL, Prisma

- Designed and developed a workflow-driven ERP for tailoring businesses covering customer management, orders, measurements, billing, payments, inventory, and delivery tracking.
- Built the React frontend with Redux state management, developed REST APIs, designed the PostgreSQL schema, and implemented authentication and role management.

CERTIFICATIONS

- Master Digital Product Design – UX Research & UI Design

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Periyar University | 2021 – 2024

PROFESSIONAL STRENGTHS

- Enterprise SaaS Development & Frontend Architecture
- AI-Assisted, Component-Driven Development
- Agile Collaboration & Problem Solving
- Production Support & Performance Optimization
- Continuous Learning, Ownership & Accountability
